Neptune Access IRM is one of the largest and most innovative specialist access companies in the Asia Pacific region. Since its inception, Neptune Access IRM has built a reputation for safety, quality, cost-effectiveness and innovation; working with clients to overcome difficult and demanding access situations through the provision of rope access, lightweight staging and tension netting techniques.

IRATA trained technicians have been the leaders in safe working in difficult situations at height for many years, with an unprecedented safety record.

Neptune Access IRM is an IRATA full member company with accreditations as an Operator and Trainer.

A dedicated facility is available in Balcatta, (Perth, Western Australia) where training is conducted to all levels of the IRATA syllabus. Our training program is designed to equip candidates with the best level of skill and safety for work in onshore and offshore environments.

Our trainers have many years of experience working in rope access and are IRATA Level 3 or 3T qualified with a nationally recognised Certificate IV trainer/assessor qualification.

Assessments are carried out in accordance with IRATA guidelines by an independent IRATA accredited assessor.

Neptune Access IRM also provides customised on-site training solutions for clients. IRATA accredited training courses have been conducted in Singapore, Philippines, Brunei, Vietnam and Indonesia.

# IRATA ROPE ACCESS TRAINING SERVICES

## ROPE ACCESS LEVELS

### IRATA Level 1

A level 1 technician is capable of performing a limited range of rope access tasks required by his or her employers under the supervision of an IRATA approved level 3 rope access supervisor. He/she is:

- not allowed to supervise others;
- responsible for all his/her own equipment, i.e. ropes, harnesses, karabiners, etc. and recording and checking the same;
- able to assist in rigging and non-standard operations under the guidance of a higher grade;
- able to undertake a rescue involving descent by him/herself and have a knowledge of hauling systems;

### IRATA Level 2

A level 2 technician is capable of rigging working ropes, undertaking rescues and performing rope access tasks under the supervision of an IRATA approved level 3 rope access supervisor. He/she should have some knowledge of legislation, safety requirements and quality assurance procedures relating to rope access.

### IRATA Level 3

Supervisors undertake a training course in advanced rescue, equipment examination and legislation. He or she shall:

- be capable of complete responsibility for work projects;
- be conversant with relevant work techniques and legislation;
- be able to demonstrate all the skills and knowledge required of levels 1 and 2;
- have a comprehensive knowledge of advanced rescue techniques;
- Hold an appropriate current First Aid certificate, to show they have undertaken suitable emergency First Aid training. First Aid requirements vary from company to company;
- have a knowledge of the IRATA certification scheme.
